

DRYMIST PBN1000-E

The PBN1000-E is 230V mains powered mister and comes with the following starter kit **FREE** of charge to ensure you operate the fogger safely.

- 1 x 5 Litre DRYMIST
- 100 x Vinyl Gloves (Choice of S,M,L,XL)
- 50 x 3 Ply Face masks
- 2 x Face Visors
- 1 x Hazmat Suit – (Choice of M,L,XL)

Used in conjunction with our DRYMIST formula, you will have the ultimate solution in protecting staff and customers from Covid-19 and all other Coronaviruses. Additionally, it will also help stop the spread of the common cold, flu, stomach upsets and many more illnesses which can infiltrate schools, businesses and homes.

Better **solutions.** Better **care.**

DRYMIST PBN1000-E

More information:

The PBN1000-E is a 'Back Pack' style mister, powered directly from mains electricity (230V AC). It can dispense at 10-20 microns from the nozzle. The PBN1000-E includes an additional nozzle to offer deep cleaning solutions (wet) at 40-60 Microns. The PBN1000-E can dispense mist up to 8 Metres.

Used with DRYMIST, you can keep your business or vehicle fully operational, as the target area or item is safe for use after 10 minutes (see application guidelines). You can then offer your customers or employees a clean and safe environment in which to operate. There is no residue or smell for the solution, and electrical equipment is safe as the product is emitted as a fine mist. Screens and mirrors completely clear within the 10 minutes (see application guidelines), saving additional cleaning. Providing you only use DRYMIST through this misting machine, we offer a limited 1 year warranty.

The PBN1000-E is extremely efficient and due to its 10 litre capacity is more suited to larger applications, such as hotels, pubs or arenas where extensive and rapid deployment is required.

Applied in accordance with our directions and with DRYMIST;

- A typical family sized car would cost less than 50p to sanitise.
- A classroom/office/shop measuring 200 cubic meters would cost less than £2.00 to sanitise.
- Our ready to use sanitiser is quick to apply and saves "downtime" on any treated area as re-entry is safe after 10 minutes (see application guidelines).
- No damage to electrical equipment (see application guidelines).

Businesses can also claim 100% of the cost of qualifying plant and fixtures against UK income or corporation tax up to £1,000,000 spend per year provided expenditure takes place before 31 December 2020 (limit reverts to £200,000 from 1 January 2021). This could mean that 100% of the net cost of our fogging units can be offset against taxable profits in a single tax year, thereby reducing the net cost to you.

We have a range of DRYMIST dispensers/machines to suit all of your needs. Homes, shops, vehicles and commercial premises of all sizes are catered for.
